WorkLife New York Experience Guide

The Resilient Workplace Designing for Engagement

A real estate strategy founded on two core principals:

- 1. Design for Physical, Cognitive and Emotional Wellbeing**
- 2. Create an Ecosystem of Spaces**

1. Design for Physical, Cognitive and Emotional Wellbeing

To foster employee engagement, the workplace needs to be designed to support employee wellbeing. The study explored broad dimensions of holistic wellbeing that address the physical, cognitive and emotional needs of people. These specific components of wellbeing are integral to employee satisfaction with their work environment and engagement.

When organizations understand this connection between wellbeing and engagement, it can inform and guide design direction for places that can impact engagement.

Designing workplaces to support the holistic wellbeing of people can amplify employee engagement and satisfaction.

Physical: Be Healthier

Support movement throughout the day and encourage healthy postures that help people stay comfortable and energized.

Cognitive: Think Better

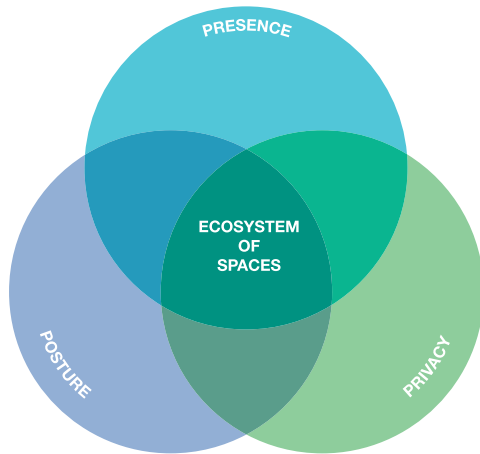

Support the need for focus and rejuvenation through spaces where individuals and teams can think clearly, concentrate easily, solve problems and generate new ideas.

Emotional: Feel Better

Support the social nature of work by creating spaces that nurture a sense of belonging and foster connections and foster connections between people and the organization.

2. Create an Ecosystem of Spaces

People at work need to focus, collaborate, rejuvenate, socialize and learn throughout their day. No single type of space can effectively support the diverse needs of individuals and groups. The workplace should be designed as an **ecosystem of interconnected zones and settings** that are destinations where people have choice and control over where and how they work.

An ecosystem of spaces enables an organization to be more resilient. It uses real estate more efficiently and cost-effectively, making it easier for organizations to experiment with different types of spaces and evolve the workplace over time.

A workplace ecosystem supports employee wellbeing by providing individuals and groups with a range of options within the workplace that consider the following:

Posture: Movement + Variety

The workplace should encourage regular movement throughout the day and offer options for people to work in sitting, standing or lounge postures.

Presence: Digital + Analog Physical + Virtual

Spaces should enable quality interactions with teams that are both local and distributed across continents and time zones, supporting both digital and analog communication.

Privacy: Focus + Rejuvenation

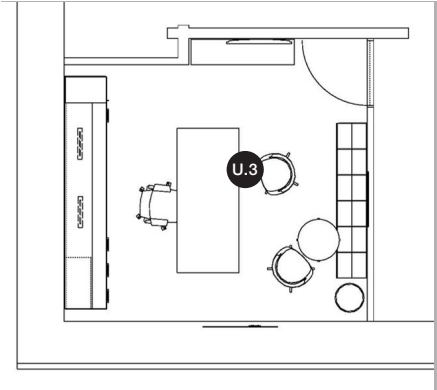

The work environment should provide places that offer varying ways to achieve privacy, in both open and enclosed spaces. Privacy is important to all workers and a vital component of both focus and rejuvenation, which are essential to employee engagement.

WorkLife New York

SETTING B.2 | RECEPTION

The welcome desk is an expression of our product and design language. The standing-height welcome desk maintains eye to eye connectivity between the host and guest.

The veneer surround is crafted with a biophilic design that highlights the vertical grain of this natural material.

The area is located adjacent to the café to provide easy access to hospitality.

SETTING Y | NOMADIC BENCH

This area supports nomadic workers and provides them a place to connect with content and their peers. The monitor is visible to all at the bench and everyone has equal access from their location, thus creating connections and supporting creative thinking.

FrameOne paired with different storage options creates a highly efficient and comfortable space in a compressed footprint. The storage with cushion top provides a place for impromptu guests.

The texture of the upholstery, the cheerful, modest print and the rustic aesthetic of the plank wood layer together to create an inspiring destination where people want to work.

SETTING X | LOUNGE MEETING

A dynamic and scalable collaborative meeting space. The lounge with shared technology democratize how people access and share information by allowing all participants to contribute their ideas — equally, quickly and seamlessly — by removing barriers to participation. The infield seating has direct access to share and display content. The outfield stool-based seating has the ability to support additional participants with equal visual access to the display.

The lounge posture creates a relaxed, comfortable environment, while tools support working and sharing of digital content.

SETTING V.3 | AGILE BENCH

This nomadic destination comfortably supports the flow from individual focused work to collaborative group interactions. Postural changes from seated to standing can be made quickly without having to adjust the furniture; the angles of the surface allows users to work comfortably in both seated and standing postures.

Open storage for personal belongings and access to power at the surface gives users easy access to the resources they need.

The dark metallic and plank walnut surface with visible grain and color variations creates an urban aesthetic and an overall informal and comfortable feel.

SETTING W.2 | SHARED EXPLORATION

A dedicated space for residents provides worktools and seating privacy for focused work. Answer panels provide efficient space division and delivery of utilities. The boundary panel provides a light scale alternative to a traditional panel when only simple space division is required. Height adjustable worksurfaces encourage healthy posture changes.

Adjacent open meeting area supports impromptu meetings within the resident zone. The media:scape application enables content sharing and generation, plus easy access to power. Users can quickly gather and immediately begin to collaborate and co-create.

SETTING V.1 | RESIDENT 8X8

This space allows residents access to appropriate work tools to support heads-down, focused work. Low panels offer a boundary while keeping views and access to coworkers.

Height-adjustable desks allow users to change postures throughout the day, supporting movement that boosts individual energy levels and leads to greater engagement.

The rail can support worktools, monitor arms, lighting and privacy/modesty screens, which allow the desk to be customized based on a user's specific needs and workstyle, and can easily be changed over time.

SETTING W.1 | FOCUSED NOMAD + RESPITE

The nomadic zone supports the broad range of mobile user needs in the workplace. The Brody WorkLounge area is a casual place where nomadic workers can connect with their technology, perform task work or find a quiet moment alone. Individual focus space with a view of an inspiring and stimulating visual allows users to escape and rejuvenate without leaving the building.

The workstation comfortably supports focused work and provides power access and a place for personal belongings.

The use of natural materials makes this work experience more human-centered and creates a more authentic aesthetic.

SETTING T | MAKER COMMONS

Socializing ideas and rapid prototyping are essential parts of creativity. This space is designed to encourage quick switching between conversation, experimentation and concentration.

This space supports a full range of postures — seated, standing, lounging and perching — encouraging movement without breaking flow.

This space has a communal atmosphere to gather and play with new ideas. The integrated Surface Hub allows people to shift easily from “me” to “we” activities and through the different stages of the creative process. Adjacent Brody WorkLounge supports quiet reflection and city views.

WorkLife New York

SETTING R | FOCUS STUDIO

Individual creative work requires places for alone time to focus and get into flow, while also allowing quick shifts to two-person collaboration. It's a place to let ideas incubate before sharing them with the group.

This space is configured to keep information private and reduce visual distraction. The Airtouch desk lifts with a touch to switch quickly and effortlessly from sitting to standing — encouraging movement and boosting energy. The desk also facilitates brief, shoulder-to-shoulder collaboration so people can easily share content from their Surface Pro 4 or Surface Book.

SETTING K.1 & K.2 | OFFICE FRONT ALTERNATIVE

In an enclosed space workers can obtain the highest level of control over stimuli, information and the ability to adjust the space to their personal preferences. These office applications should be imagined fully enclosed. This space is meant to allow visitors to fully engage and experience the environment without the physical boundaries of the walls.

These spaces reflect the trend how ownership of private offices is changing. The K.1 office is an owned resident space whereas K.2, with the use of the RoomWizard, reflects an opportunity for the space to be reserved or shared by others, such as a single user requiring focus or a small team requiring a space to meet.
